

AMENDMENTS TO THE CLAIMS

1. (currently amended): A gutter sweep for cleaning debris from a house gutter, said gutter sweep comprising:

a scooping head comprising

[having] a blade end having a concave face and a convex back, said blade end having a substantially longitudinal axis,

and a head attachment end having a longitudinal axis, said handle longitudinal axis being substantially parallel to said blade end longitudinal axis, said handle attachment end and said blade end connected [wherein said blade end is curved] in a manner allowing said blade end to fit up and over a gutter;

A' a handle having a gripping end and a handle attachment end;
and

zero or more attachment[s] poles, each pole having a pole attachment ends.

2. (original): The gutter sweep of claim 1, wherein said scooping head has a plurality of cleaning bristles positioned on said blade end.

3. (original): The gutter sweep of claim 1, further comprising a rubber grip attached to said handle gripping end.

4. (original): The gutter sweep of claim 1, wherein said attachment poles are composed of material from the group consisting of wood, plastic, metal, composite material, or a combination thereof.

5. (original): The gutter sweep of claim 1, wherein said scooping head is composed of material from the group consisting of wood, plastic, metal, composite material, or a combination thereof.

6. (currently amended): A gutter sweep for cleaning debris from house gutters, said gutter sweep comprising:

a scooping head comprising

[having] a blade end having a concave face and a convex back, said blade end having a longitudinal axis, and

scoop or handle
and a head attachment end having a longitudinal axis, said handle longitudinal axis being substantially parallel to said blade end longitudinal axis, said handle attachment end and said blade end connected [wherein said blade end is curved] in a manner allowing said blade end to fit up and over a gutter;

A'
an attachment pole having a first pole attachment end and a second pole attachment end, said first pole attachment end being detachably affixed to said head attachment end; and

a handle having a gripping end and a handle attachment end, said handle attachment end detachably affixed to said second pole attachment end.

7. (original): The gutter sweep of claim 6 wherein said scooping head has a plurality of cleaning bristles positioned on said blade end.

8. (currently amended): A gutter sweep for cleaning debris from house gutters, said gutter sweep comprising:

a scooping head comprising

[having] a blade end having a concave face and a convex back, said blade end having a longitudinal axis, and

and a head attachment end having a longitudinal axis, said handle longitudinal axis being substantially parallel to said blade end longitudinal axis, said (handle) attachment end and said blade end connected [,wherein said blade end is curved] in a manner allowing said blade end to fit up and over a gutter; and

A'
a pole body affixed to said scooping head, wherein said pole body has a gripping end.

9. (original): The gutter sweep of claim 8 wherein said scooping head has a plurality of cleaning bristles positioned on said blade end.

10. (original): The gutter sweep of claim 8, further comprising a rubber grip attached to said handle gripping end.
